DG447, DG448

Vishay Siliconix

Low Power, High Voltage SPST Analog Switches

DESCRIPTION

The DG447, DG448 dual are supply single-pole/single-throw (SPST) switches. On resistance is 25 Ω maximum and flatness is 2.2 Ω max over the specified analog signal range. These analog switches were designed to provide high speed, low error switching of precision analog signals. The primary application areas are in the routing and switching in telecommunications and test equipment. Combining low power, low leakages, low on-resistance and small physical size, the DG477, DG448 are also ideally suited for portable and battery powered industrial and military equipment.

The DG477 has one normally closed switch, while the DG448 switch is normally open. They operate either from a single 7 V to 36 V supply or from dual \pm 4.5 V to \pm 20 V supplies. They are offered in the very popular, small TSOP6 package.

BENEFITS

- Wide dynamic range
- Low signal errors and distortion
- Break-before-make switching action
- Simple interfacing
- Reduced board space
- · Improved reliability

FEATURES

- ± 15 V analog signal range
- On-resistance R_{DS(on)}: 25 Ω max.
- Fast switching action ton: 100 ns
- V_L logic supply not required
- TTL CMOS input compatible
- · Rail to rail signal handling
- · Dual or single supply operation
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

APPLICATIONS

- Precision test equipment
- · Precision instrumentation
- · Communications systems
- PBX, PABX systems
- Audio equipment
- Redundant systems
- PC multimedia boards
- Hard disc drives

Notes

a. Refer to PROCESS OPTION FLOWCHART

b. Room = 25 °C, full = as determined by the operating temperature suffix

c. Typical values are for DESIGN AID ONLY, not guaranteed nor subject to production testing

d. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this datasheet

e. Guaranteed by design, not subject to production test

f. V_{IN} = input voltage to perform proper function

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

PRODUCT SUMMARY		
Part number	DG447	DG448
Status code	2	2
Configuration	SPST x 1, NO	SPST x 1, NO
Single supply min. (V)	7	7
Single supply max. (V)	36	36
Dual supply min. (V)	4.5	4.5
Dual supply max. (V)	22	22
On-resistance (Ω)	32	32
Charge injection (pC)	12	12
Source on capacitance (pF)	30	30
Source off capacitance (pF)	8	8
Leakage switch on typ. (nA)	0.1	0.1
Leakage switch off max. (nA)	1	1
-3 dB bandwidth (MHz)	-	-
Package	TSOP-6	TSOP-6
Functional circuit / applications	Multi purpose, instrumentation, medical and healthcare	Multi purpose, instrumentation, medical and healthcare
Interface	Parallel	Parallel
Single supply operation	Yes	Yes
Dual supply operation	Yes	Yes
Turn on time max. (ns)	130	130
Crosstalk and off isolation	-72	-72

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations.
