

75 Ω TRIAXIAL CONNECTOR FOR BROADCASTING REDEL F SERIES

REDEL F Series (75 Ω)

The REDEL F Series is a range of self-latching triaxial connectors specifically designed for TV cameras. The design of these connectors is particularly compact, they are easy to assemble and have an excellent electrical performance.

The REDEL F series is a 75 Ω connector that can be used for digital or analog signal transmission.

Available with crimp or solder central contact.

The connector guarantees a protection index of IP66 as per IEC 60529 standard. They are fully intermatable with the 1051 A004 Series.

These connectors are especially dedicated to the Nordic, Spanish and Asian market.
